

## Planning Team Meeting Process:

1. How does your school define success for each student and does this definition include pathways for success?

2. What can you do at your school to provide unique definitions of success that include pathways for every student?

3. How have you documented the goals and aspirations of every student at your school? (See Module 5—Individual Student Profile.)

4. Have you provided opportunities and pathways to meet these goals?

5. How has your school worked to provide additional experiences that enrich students and how have you informed parents of these opportunities?

6. What additional curricular and co-curricular experiences at school and in the community could you provide for your students?

7. What additional strategies and actions from the discussions could be implemented at your school?

8. What support or professional development will be needed to ensure successful implementation of these strategies?
